DETAILED ACTION

1. Claims 2-29 are allowed.

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of claims 2-14 is the inclusion of, inter alias, the mode selection circuit (having selectable input/output stages) configured to provide an output signal to the differential output for controlling the multi-mode operational amplifier, and wherein the mode selection circuitry is enabled or disabled by a selectable signal so as to reflect an operational mode. For claims 15-22, the primary reason for allowance of the claimed invention is the inclusion of, among other things, the selectable input and output stages. And for claims 23-28, the primary reason for allowance of the claimed invention is the inclusion of, among other things, parallel input stage and parallel output stage, wherein the parallel input stage coupled to the reference and arranged to provide a second output signal on a second differential amplifier output, and the parallel output stage coupled to the second differential amplifier output and arranged to output a control signal to the differential amplifier output. None of the prior art discloses an operational amplifier that includes these features of the claimed invention. Therefore, claims 2-29 are allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
